

**PRIMA  
KLIMA**

# Certificate

**CO<sub>2</sub>-integration**

.....

**Stannol GmbH & Co. KG  
has reduced CO<sub>2</sub> emissions  
in the amount of 192,6 tons  
in 2026.**

.....

In our certified projects, CO<sub>2</sub> emissions are offset through reforestation and the protection of rainforests. Trees store water, protect the soil, and provide habitats for animals and plants. In this way, a measurable and sustainable impact is created for climate protection, biodiversity, and improved livelihoods for local communities.

Your contribution helps the future grow!
